Alerts

Geofencing alerts

With the UD Telematics Mobile App, geofencing alerts are delivered to your mobile phone as push notifications. In the event of any deviation, you are informed in real-time.

1. Alert with situational information
2. Visualise the alert location on map
3. Direct contact with your driver

'Geofence'

Tap to expand

Fuel level change alerts

The Mobile App notifies you of any fuel loss event via push notification. This allows you to take further action and investigation.

1. Indicate the actual fuel drop
2. Alert with situational information
3. Visualize the alert location on map

'Fuel Level Change'

UD Telematics Mobile App

Keep track of your operations wherever and whenever you need

UD Trucks Corporation

UD Telematics Mobile App

Keep track of your operations whenever and wherever you need

Why UD Telematics?

To be successful in today's transportation business, it is all about timely and precise decisions.

The UD Telematics Mobile App connects you in real time with your operations, allowing full visibility on your fleet even while on the move.

Key benefits of UD Telematics:

(i)   Real time assets tracking
(ii)   Real time alerts to help you optimise your operations
(iii)   Vehicle and driver data analysis to help you improve your business
(iv)   Connectivity with UD Dealers to improve your uptime

The UD Telematics Mobile App is a compact version of our fully fledged UD Telematics web platform which is available on both IOS and Android platforms.

Available on the **App Store**

Get it on **Google play**

Why Mobile App?

1 Mobility

Allows you to keep track of your business whether at the office or on the move.
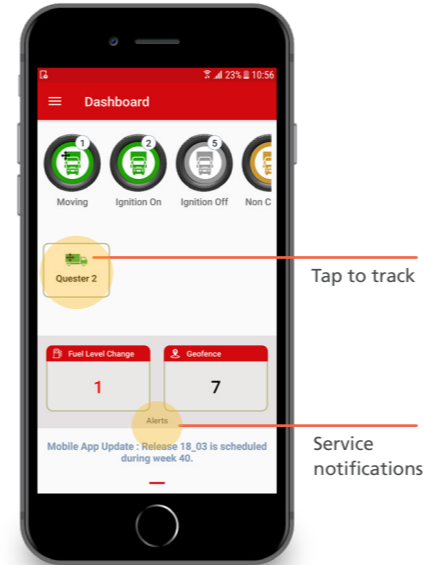

2 Simplicity

Simple and effective visualization allows quick decisions.

Dashboard

Get an instant overview of your current fleet situation

Once logged in, you get an overview of your fleet. The dashboard also informs you about active notifications.
